EXPERIENCE

Freelancer

Senior Software Engineer

September 2017 to present

London

- Currently freelancing and open to speaking about contracting opportunities.
- East London based by open to travel.

ustwo

Fullstack Developer

August 2015 to August 2017

London

- The agency nature of the company meant that the working environment was geared around medium length projects using a wide range of technologies. Because of the very product focussed mindset, pragmatic solutions that furthered clients objectives were generally preferred over 'perfect' engineering.
- A large proportion of the work was centred around product discovery in combination with user testing. The aim being to validate or disprove ideas as quickly as possible.
- Teams worked in an agile manner and were always very cross functional, with developers, designers and product owners working together to prioritise and plan what work would be done next.
- The expectation was that teams would be entirely responsible for their infrastructure as well as their code. This meant that most of the projects involved setting up CI pipelines, managing deployments and integrating automated testing where appropriate.
- Projects were mainly React.js with either Node or Python backends. Some amount of Scala/Play framework used at points.

Pusher

Platform Engineer

August 2014 to July 2015

London

- Primarily involved in building a new distributed messaging bus for the Pusher software stack.
- Production codebase was heavily event driven, much of it utilising the Ruby event machine library.
- A very small development team meant that roles changed regularly, shifting between support, core engineering and ops.
- Very much a polyglot environment using mainly Haskell, Ruby and Javascript, but with many other languages used for client libraries and small tools.

Mind Candy

Tools Software Engineer

April 2012 to July 2014

London

- A highly varied role that involved building internal tools, maintaining third-party software, supporting product teams and making sure knowledge was shared.
- Also responsible for maintaining continuous integration systems and training other developers on how to use them.
- Mix of Scala/Play Framework, Backbone/Angular and Python with PostgreSQL, Elastic Search and Cassandra databases.

Fidessa Plc

Operational Engineer

Jan 2009 to April 2012

Woking, Surrey

- Part of a small support and development team, mostly responsible for creating tools to aid long term capacity planning and server management.
- Heavily involved with talking to tool users, gathering requirements and task prioritisation.
- Fairly standard Solaris, Apache, MySQL and PHP stack.

EDUCATION

University of Reading

2005 to 2008

BEng Electronic Engineering 2.1

- Final year project was to create an analogue drum machine.
- Learnt to program in C, C++ and some amount of assembler, primarily targeting embedded micro-controllers,
- Also gained a solid grounding in DSP theory and engineering mathematics.

Eton College

1999 to 2004

A Levels Physics, Maths and Further Maths

AS Levels I.T. and Electronics

GCSEs English, French, Latin, Chemistry, Physics, Biology, Maths, Electronics

TECHNICAL SKILLS

Languages	Haskell, Scala, Python, Javascript, Bash, C
Frameworks	Play, Backbone, React, Express, Angular, Flask, Django
Databases	MySQL, PostgreSQL, Redis
Tools	Git, SVN, Docker, Puppet, General *nix sysadmin
Infrastructure	AWS, Google Cloud, Kubernetes
Management	Agile Development Practices, DevOps, Continuous Integration

INTERESTS

I'm heavily interested in the cross over of code with art and music, and have created or been involved with a number of projects along these lines. I am one half of LiveCodeLab, a duo doing live coded audio visual performances at venues ranging from boat and warehouse parties to the London Science Museum. At the end of 2013 I was involved with an installation in the Puerto Rico Museum of Art, writing the software for a computer controlled, reconstructed piano as part of the Lexus with the Arts program. I also produce music and play guitar, though primarily for my own pleasure.

Outside of coding and art, I'm a keen rock climber, having now spent a significant amount of time climbing outside around the U.K. My decision to start contracting was mainly down to wanting more flexibility in how I work so I can spend more time falling off cliffs.

Public speaking is something I enjoy and am always looking for opportunities to do more, whether that be in a technical capacity or otherwise. I've previously presented on subjects ranging from software tool development to language design for live coding environments.
